Peregrine-CMS

A head optional, Apache Sling based CMS

Ruben Reusser, headwire.com, Inc

What is Peregrine-CMS?

A head optional cms based on:

- Apache Sling
- VueJS and friends for administration
- Client side rendering
- Server side rendering
- Administration supported in modern browsers

Why Peregrine-CMS?

It's often easier to complain
than to build a system yourself

DEMO

Features

- SPA/PWA ready rendering approach
- Components based
- Pages
- Templates
- Assets
- Generic objects (lists, hierarchies)
- Image renditioning pipeline (vips)
- NodeJS support through J2V8 for server side rendering

- Single instance or author/publish model
- Replication (in instance, to file system, to s3, sling distribution)
- Sling models
- Easy front end development process
- Automated front end test suite
- Support for multiple languages

Thanks go to

- Apache Sling Team
- Apache Oak
- Composum
- WCM.IO
- J2V8
- VueJS
- Vue Form Generator
- MaterializeCSS
- VIPS
- Maven
